Local Construction Firm Offers 3D Design

LYONS, ORE., 27 FEB 2008 – Hueller Construction of Lyons, Oregon is now offering a new service: detailed, high quality, three-dimensional designs of your remodeling project — provided *before* you build. With a new professional home design software program, the remodeling company can illustrate the design of your space and produce three dimensional drawings that will help you better envision the final product.

“We can help a client see what their space would look like with a new window,” says Kurt Hueller, owner and general contractor of Hueller Construction. “Oftentimes in a kitchen remodel, clients want to know if they’ll have room for their new refrigerator. This program can show that kitchen design so we know what will fit ahead of time.”

This powerful software program is specifically designed for the residential and light commercial design professional. Move a wall; add a room; redesign a kitchen; change materials; play with textures, color and lighting – all prior to building. The service helps establish a vision for the final product ahead of time, improving company and client communications and helping avoid misunderstandings.

Hueller Construction provides this new design service to clients with remodeling projects of a significant scale. To find out if your project fits the bill for three-dimensional design service, call Kurt Hueller at 503.859.3575 or e-mail kurt@huellerconstruction.com. To read more about Hueller Construction, visit the web site at www.huellerconstruction.com.
